28th MHIAPSMIPHCON-27

ORAL PAPER PRESENTATION

[Insert full title of the research paper]

[Presenter name] | [Co-authors]
[Department / Institution]

Maharashtra State Conference of IAPSM & IPHA

Theme: Changing Public Health Paradigms: Peace • Preparedness • Resilience

MGM Medical College, Chhatrapati Sambhaji Nagar | Doyatan Hall

Standard oral presentation template • Replace all bracketed text before presenting

INTRODUCTION & RATIONALE

Background • Public health relevance • Why this study was needed

Brief background / current context

Magnitude of the problem (use 1–2 key figures with source)

Knowledge or practice gap addressed by the study

AIM & OBJECTIVES

State the research question clearly and keep objectives measurable

Aim: [One concise sentence]

Primary objective: [Specific and measurable]

Secondary objective(s): [If applicable]

MATERIALS & METHODS

Study design • Setting • Participants • Measures • Analysis

Study design and study period

Study setting, population, sample size and sampling method

Inclusion / exclusion criteria and data-collection tools

Key variables, statistical tests and ethics approval / consent

RESULTS: PARTICIPANT PROFILE

Show who participated and the key descriptive findings

Participants included / response rate: [n, %]

Key sociodemographic or baseline characteristics

Use a simple table, bar chart or flow diagram where appropriate

RESULTS: KEY FINDINGS

Present findings in the same order as the objectives

Primary outcome / main result: [n, %, estimate or measure]

Secondary findings: [2–3 most important results]

Include confidence intervals / p-values where relevant; label all figures clearly

DISCUSSION

Interpret the findings • Compare with literature • Explain relevance

What do the main findings mean?

Compare with 2–3 relevant studies or published evidence

Possible explanations and implications for public health / practice

STRENGTHS & LIMITATIONS

Be transparent about study quality and interpretation

Major strength(s) of the study

Important limitation(s) and potential sources of bias

How limitations may affect interpretation or generalisability

CONCLUSION & RECOMMENDATIONS

Answer the objective • State the practical message

One-sentence conclusion directly supported by results

Actionable recommendation(s) for policy, programme or practice

Future research / next step (if relevant)

ACKNOWLEDGEMENTS & DECLARATIONS

Acknowledge support and disclose relevant information

Acknowledgements / funding: [Name or state “None”]

Ethics approval and informed consent: [Committee / reference, as applicable]

Conflict of interest: [Declare or state “None”]

Thank you • Questions
